SUMMARY

Software engineer highly skilled in building backend systems with Java, Spring Boot, and microservices, and frontend apps with React and Next.js. Experienced in designing APIs, optimizing databases, and deploying scalable cloud applications on AWS with Docker and Kubernetes. Hands-on with tools like Kafka, ELK Stack, and Redis for efficiently handling real-time data and monitoring.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C/C++, SQL, HTML/CSS

Frontend: React, Next.js, Angular, JQuery

Backend: Spring Boot, Spring MVC, Django, Node.js, Express.js, RESTful APIs, GraphQL, Microservices, OpenAPI/Swagger

Databases: PostgreSQL, MySQL, Oracle DB, MongoDB, Redis

Tools: Git, GitHub, Apache Kafka, RabbitMQ, JUnit, Docker, Kubernetes, Jenkins, GitHub Actions, Postman, Jira

Cloud Technologies: AWS (EC2, S3, Lambda, API Gateway, CloudWatch, RDS)

EXPERIENCE

Programmer

March 2024 – Present

Wisdom Square Technologies

Remote

- Enhanced the internal logging framework by incorporating features to mask sensitive data, thereby strengthening data security and ensuring compliance with privacy regulations.
- Automated the sending of physical mail using a third-party service, reducing manual effort by about 50% and ensuring timely delivery of correspondence.
- Built an automated reminder system for agents to follow up on scheduled account interactions, increasing task completion consistency by around 20%.
- Built a utility for Excel file operations, which supports creating, reading, and converting files to CSV and PDF formats. This tool streamlined data handling and reporting, making it easier to manage and analyze information.

Software Engineer

August 2022 – February 2024

Alippo

Bangalore, India

- Integrated Alippo Money into the checkout process for both Android and iOS platforms, implementing in-app purchase gateways and robust server-side validations which enhanced the checkout experience and reduced customer drop-offs.
- Redesigned the analytics service to integrate with multiple analytics providers, increasing data visibility and boosting reporting accuracy by nearly 40%.
- Strengthened a critical API that faced a DDoS attack by implementing HMAC-based authentication, reducing unauthorized traffic by more than 90% and improving system reliability.
- Implemented database indexes to enhance query performance, optimizing API response times. This adjustment significantly increased data retrieval efficiency and provided a more responsive user experience.

Software Engineer Intern

April 2022 – July 2022

Alippo

Bangalore, India

- Built a responsive activation screen and interactive dashboard for Alippo Money, which improved the checkout flow and reduced user drop-offs by around 20%, leading to a smoother purchase experience.
- Enhanced the JHipster dashboard with advanced search, filtering, course cloning, and manual order management tools. These updates streamlined workflows, improving the operations team's efficiency and task management.
- Applied TypeScript to improve code quality, enabling early error detection and maintaining a scalable codebase. This approach facilitated better development practices and enhanced overall code reliability.

PROJECTS

ShopMate | Spring Boot, Spring Security, JPA, PostgreSQL, REST APIs

- Built a Spring Boot backend for an e-commerce app with secure authentication and authorization using Spring Security.
- Designed RESTful APIs for product management, cart operations, and order processing, ensuring smooth communication.

Rhino | React, Firebase

- Built an expense tracking application with Google Sign-In authentication and PWA support.
- Added transaction management, theme toggling, and offline detection features.

EDUCATION

Kennesaw State University

Master's degree, Computer Science

Marietta, United States

August 2024 – Present

Anurag Group Of Institutions

Bachelor's degree, Information Technology

Hyderabad, India

July 2018 – May 2022
